Moamal Hussin Al-Janabi

Full-Stack Engineer

+9647700568699 | dev.moamal@gmail.com | Najaf, Iraq | https://moamal.space

PROFESSIONAL OVERVIEW

Full-Stack Developer and Backend Engineer with 6+ years of experience across freelance projects and internal business applications. Skilled in React, ASP.NET, Dapper, Node.js, Bun, and PHP, with SQL Server, PostgreSQL, and MySQL. Experienced in translating business requirements into web applications, REST APIs, and integrated database workflows.

WORK EXPERIENCE

Backend Engineer | Al-Ataba Al-Alawiya, Najaf, Iraq JUN 2026 – PRESENT

- Develop backend services and REST APIs using ASP.NET.
- Manage “SQL Server” data access with Dapper, queries, and stored procedures.
- Implement business logic, handle errors, and resolve backend issues.

Full-Stack Developer | Freelancer APR 2020 – PRESENT

- Develop custom web applications with React, translating client requirements into interfaces and backend workflows.
- Build backend APIs using PHP, Node.js, and Bun, integrating MySQL and PostgreSQL databases.
- Implement application features across the frontend, backend, and database, connecting user interactions with business logic.
